Support the Festival

The International Uranium Film Festivals creates a neutral space to throw light on all nuclear issues. It stimulates new productions, supports "nuclear" filmmaking and the discussion about the nuclear question in Brazil and worldwide. It is a global project. Every year we receive more invitations to bring the festival with its important films to other countries and places. For example after Berlin a further traveling Uranium Film Festival is planned in Amman, the capital of Jordan in December. But to organize the Uranium Film Festivals is only possible with financial support from individual donors to foundations and to corporate sponsors.

The legal organizer of the International Uranium Film Festival in Brazil and world-wide is the non-profit arts and cultural organization "Yellow Archives" (Arquivo Amarelo), based in Rio de Janeiro and registered as Brazilian charity.

We welcome your contribution!
